**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 16-21, drawn to a communication apparatus comprising a base transceiver station having a control channel and a non-terrestrial repeater for projecting a beam containing the control channel on the earth, classified in class 455, subclass 431.
- II. Claims 11-15, drawn to a communication system for influencing relative loading on a plurality of access channels in single beam, classified in class 455, subclass 453.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II have different modes of operation.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2683

their different classification, restriction for examination purposes as indicated is proper.
